ABOUT US

YILTAŞ GRUP has been producing turnkey solutions in Construction Applications from Foundation to Roof and Industrial Facility Applications primarily in the Thrace Region and throughout Turkey since 2005.

Our Main Activities Are:

- Industrial Floor Applications (Epoxy, Linoleum, PU Floor, etc.)
- Epoxy Paint and Materials Sales
- Construction Contracting, Architecture, Design, and Permitting (Field Concrete, Renovation, Repair)
- Prefabricated Structures (Factory, Residential, and Site Buildings)
- PPE and Hardware Product Supply, Retail and Wholesale Sales

YILTAŞGRUP has been signing versatile projects with its experienced team since its establishment and continues to do so. Our company operates based on the principle that "knowledge creates quality, and quality creates references", and provides quality production and services from design to delivery by being personally involved in every stage from project work to manufacturing and installation supervision on site.

The most important factors that have led YILTAŞGRUP to success are its trust in its team working with a professional work discipline, its quality approach to production, allocating a significant portion of its income to technological investments to increase production quality, and above all, the happiness derived from customer satisfaction.

YILTAŞGRUP's managers are a group of professional architects and engineers who love their job and are respectful towards their profession and its requirements. You can see the projects carried out by our company on the references page.

Our goal is to continue our existence as the best, most successful and reliable company in our industry and constantly improve ourselves.

Our mission is to meet all the needs of our customers, who we are a solution partner for, with our customer-focused approach, allowing them to reduce their workload, save time, and reflect maximum benefit.

Our vision is to maintain our leadership in the industry by providing solutions to problems, keeping up with technological changes, creating sectoral balance, setting direction, creating competition conditions, reflecting the positive benefit of this, and above all, reinforcing the sense of trust we have gained.

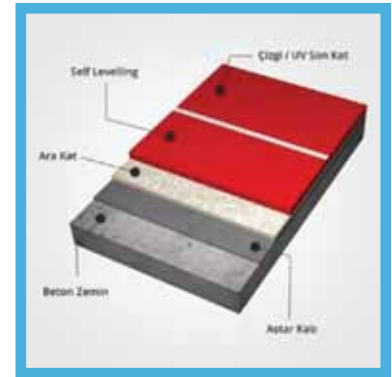

- Customer focus,
- Transparency,
- Quality service,
- Accountability,
- Openness to change and development,
- Reliability.

- Openness to collaboration,
- Teamwork,
- Respect for people and sensitivity to the environment,
- Solution-oriented approach,
- Allowing employees to be creative,
- Social responsibility.

Epoxy, polyurethane, and linoleum floor coating.

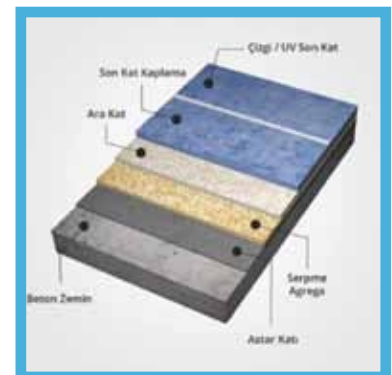

Epoksi Self Levelling

This is a three-layered EPOXY-based floor coating system designed for surfaces exposed to high hygiene requirements, medium traffic (with rubber-wheeled transport pallets, light forklifts, and basket carts) and moderate exposure to chemical substances, especially in food production facilities, the entire pharmaceutical industry, and other environments that require high hygienic cleaning. It provides a complete flooring solution with its smooth surface, easy-to-clean feature, color variety, and edge and corner details.

Epoksi Multi Layer

Epoxy Multi-layer coatings are a durable and resilient floor coating system preferred in areas with high pedestrian and vehicular traffic, such as factories, shopping malls, warehouses, stations, and parking lots. Especially designed for floors that are subjected to medium-weight loads (such as transpallets and rubber-wheeled forklifts) and medium-strength chemical exposure, this reinforced epoxy-based flooring is applied in three layers and can provide slip resistance with desired surface roughness.

Epoksi Coating

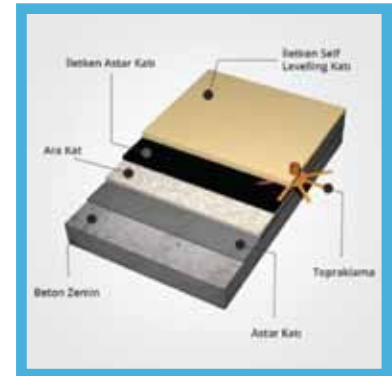

EpoxyCoating coating is a floor coating that is easy to clean, has a smooth or orange peel surface and does not collect dust. It can be applied seamlessly, making it easy to clean and has high mechanical strength. It is resistant to many chemical substances. It is particularly recommended for floors exposed to light loads and moderate chemical effects, and is a quick and economical floor coating system.

Epoxy, polyurethane, and linoleum floor coating.

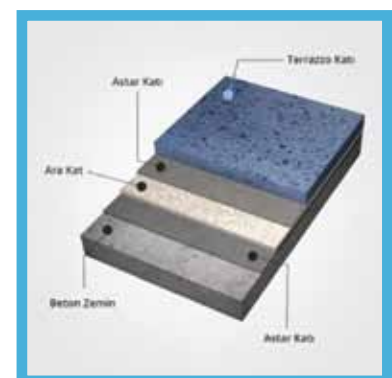

Epoksi Anti-Static:

Epoksi anti-static coating is an easy-to-clean and dust-free flooring system with moderate mechanical strength and chemical resistance. The aim of anti-static coating is to remove static electricity from the environment with copper bars.

Epoksi Terrazzo:

Epoksi Terrazzo is a flooring system that uses strong adhesive and high chemical-resistant epoxy resins with terrazzo coating. Today's terrazzo can reflect architects' designs on floors with more vivid colors compared to the past, providing operational advantages over other flooring materials with its long life and low maintenance cost. Additionally, it gives designers the freedom to create eye-catching colors and stunning patterns. This feature is unique to epoxy terrazzo coating and allows any design to be applied with the right color-aggregate combinations.

3D Epoxy:

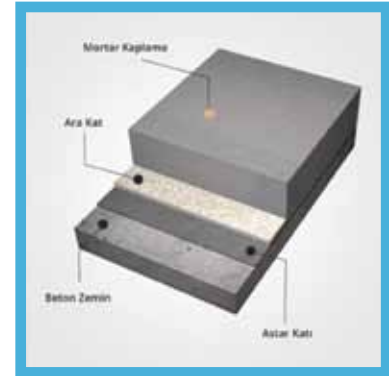

The superior technology developed for 3D flooring makes it possible to create extraordinary designs for many applications such as shopping malls, workplaces, hotels, homes, hospitals, schools, and more. The products we use in 3D flooring are not harmful to human health and are antibacterial, washable, wipeable, and sweepable. At the same time, it provides insulation for the applied floor, is impact-resistant, and does not scratch, break or crack.

EPOXY, POLYURETHANE, AND LINOLEUM FLOOR COATINGS.

Epoxy Mortar

Epoxy-based mortar coatings are the most durable among epoxy-based coating systems. Designed for surfaces exposed to heavy loads that are either stationary or dragged (such as rubber, hard plastic, iron-wheeled pallet jacks, forklift traffic, and friction from pallets and baskets) and moderate chemical exposure, this reinforced epoxy-based floor coating is applied in approximately four layers and has a thickness of about 5mm, with the desired surface roughness and slip resistance. Its special structure is resistant to the toughest conditions for years.

- Internal Road Markings
- Linoleum Flooring
- Polyurethane Flooring
- Sports Field Surface Coatings
- Parking Lot Flooring Applications

APPLICATIONS

CONSTRUCTION CONTRACTING, ARCHITECTURE, PROJECT DESIGN, AND PERMITTING

Although industrial constructions have a low share in the construction sector, they constitute one of the important job fields of YILTAŞGRUP in terms of their contribution to the country's economy and requiring special expertise. Industrial buildings such as factories, warehouses, and manufacturing workshops are completed by YILTAŞGRUP professionalism in the optimum time.

According to Customers Needs

- Factory Buildings
- Repair, Renovation, Maintenance & Repair
- Field Concrete Applications
- Roof Insulation and Repairs

FOR INFO: info@yiltasgrup.com.tr

The central logo for YILTAŞ GRUP is a blue diamond shape composed of four triangles. Below it, the text "YILTAŞ GRUP" is written in a bold, black, sans-serif font. Underneath the company name is the website address "www.yiltasgrup.com.tr". Surrounding the central logo are ten circular icons, each containing a product category: LINOLIUM, PVC, COATING, SELF-LEVELING, MORTAR, MULTI-LAYER, TERRAZO, ANTISTATIC EPOXY, POLYURETHAN, and EPOXY. At the bottom of the central logo area are three circular certification logos: ISO 9001 (Quality Assurance Management), ISO 14001 (Environmental Management), and OHSAS 18001 (Occupational Health & Safety).
